CERTIFIED ETHICAL HACKER

The CEH v13 training program consists of advanced modules covering a broad spectrum of cybersecurity technologies, tactics, and procedures, now deeply integrated with Artificial Intelligence (AI). Spanning a comprehensive curriculum, the program is meticulously structured to provide essential knowledge for prospective ethical hackers, continually evolving to align with the latest advancements in AI systems, cloud security, IoT/OT, and cutting-edge malware. The curriculum is divided into 50% knowledge-based training and 50% hands-on application in our advanced AI- powered cyber range. Labs reinforce each tactic with step-by-step exercises in a virtualized environment, offering practical experience with real-world tools and vulnerable systems, including AI exploitation. Participants gain comprehensive hands-on skills through cutting-edge lab technology, enabling effective application of their knowledge against modern, AI-augmented threats.

About Blitz CYBER SECURITY

About 90% of aspiring cybersecurity professionals want to work on real-world systems and networks, but nearly 65% struggle when facing actual cyber threats in professional environments. In today's digital era, cyber attacks are becoming increasingly sophisticated, affecting businesses, healthcare, finance, and government sectors. Our 1 / 3 Cyber security Program is designed for students, working professionals, and career changers who want to build practical, industry-ready skills in a short time. This intensive program blends foundational theory with hands-on practice, helping learners understand how to secure systems, networks, and applications in real-world scenarios.
